ABOUT ME

Product-minded Software Engineer with 4+ years of experience building customer-facing products in regulated environments. Specialized in React, TypeScript, frontend architecture and scalable product development, with hands-on experience in Node.js and API-driven systems.

Currently taking on technical leadership responsibilities and collaborating across Product, Backend, Design and QA to deliver reliable and maintainable banking experiences.

EDUCATION

BSc Computer Engineering

University of Granada

2018 - 2022

HIGHLIGHTS

- Technical Lead — Customer vertical
- Shared tooling & frontend foundations
- CI/CD & release-quality improvements
- On-call & incident investigation

LUIS AROSTEGUI RUIZ

SOFTWARE ENGINEER

WORK EXPERIENCE

OPENBANK - SOFTWARE ENGINEER

2024 - present

Santander group digital bank

- Led the design and delivery of customer-facing banking experiences built with React, TypeScript and modern JavaScript, supporting critical journeys including customer profiles, KYC, consent management, accounts and deposits.
- Designed a reusable dynamic form architecture used across web and hybrid applications, reducing duplicated implementation work and improving consistency between multiple banking journeys.
- Collaborated closely with Product, UX/UI, backend engineers and QA from initial requirements and prototypes through implementation, testing and production release.
- Improved frontend quality and maintainability by leading ESLint and layout migrations, strengthening automated testing with Jest and React Testing Library, and promoting strongly typed, reusable components.
- Coordinated technical decisions and delivery across the Customer vertical, identifying dependencies, reviewing implementations and supporting engineers during critical releases.
- Debugged complex production issues across frontend, backend integrations and browser behaviour in a large-scale banking platform.

NUCLEOO - SOFTWARE ENGINEER

2022 - 2024

Technology consultancy

Ksyos – Healthcare Platform

- Built and shipped full-stack healthcare workflows using TypeScript, React, Node.js and PostgreSQL.
- Implemented secure SAML authentication for practitioner and patient workflows.
- Built CI/CD and infrastructure workflows with GitHub Actions, AWS and Terraform, supported by automated testing and Datadog observability.

Retailisation – Supply Chain Platform

- Developed frontend and backend capabilities with Angular, TypeScript, Python, MongoDB and PySpark for supply-chain optimisation.

SKILLS

Core: TypeScript · JavaScript · React · Node.js · PostgreSQL

Engineering: Developer tooling · CI/CD · GitHub Actions · Automated testing · Code reviews · Code quality tooling · Webpack · Responsive mobile-first

Cloud & Operations: AWS · Terraform · Docker · Datadog · On-call · Incident investigation

Additional: Next.js · Angular · Express · REST APIs · SAML · Python · MongoDB · PySpark · Styled Components

Collaboration: Technical coordination · Cross-functional delivery · Professional English
